Advantages of Plastic Pallets over Wooden Pallets.

- **Lightweight and Compact.**
Easy to lift, easy to move, and easy to ship.
- **Durability**
Wooden pallets disintegrate into splinters and snap. Plastic pallets do not break. They are designed to be strong to withstand damage.
- **East to clean.**
The plastic pallets are non-porous and hence are easier to clean than wooden pallets. If wooden pallets get wet they attract termites and fungus.
- **Eco Friendly**
These pallets can be recycled and upcycled . Wood once infested with termites has to be scrapped.
- **Safe**
Plastic pallets do not have nails and sharp edges hence they do not hurt handlers.
